

Special Cases IL Fedora core upgrade

19 Desktops need repartitioning with data saving. These are:

Computer	user	date/time	Remarks
appel	ke		data disk contains data
asselijm	roland		data disk contains data
averkamp	ostroukh		data disk contains data
bega	clauwens		data disk contains data
berchem	baireuther		data disk contains data
bol	chen		data disk contains data
bosch	bovenzi		data disk contains data
hackaert	ivashko		data disk contains data
ketel	sulangi		data disk contains data
lataster	marciani		data disk contains data
lucebert	tarasins		data disk contains data
maes	vangorse		data disk contains data
magritte	jmjvanl		data disk contains data
memling	klug		data disk contains data
mieris	bagrov		data disk contains data
potter	kaplis		data disk contains data
raedecker	davison		data disk contains data
rembrandt	beuman		data disk contains data
steen	palchyko		data disk contains data
vangogh	garzilli		data disk contains data

There are 5 desktops that already have the correct partitions:

Computer	user	date/time	Remarks
buytendijk	vromans		new partition table
dou	amoretti		new partition table
ravenswaaij	cheianov		new partition table
ruisdael	najian		new partition table
weenix	debruin		new partition table

There are 34 desktops that can be repartitioned without data saving as their /export/data are empty.
