

Remote Workspace

The Lorentz Institute provides all of its users with access to a virtual workspace which emulates the Institute physical workstations and their custom software setup by means of only a web browser without the installation of plugins or extra software. The immediate advantages to the users are

Access to the Lorentz Institute workstation setup from the comfort of your laptop, wherever you are, and without VPN or SSH tunnels
Access to your documents/files at the Lorentz Institute from a web browser window without installing extra software
Access to intranet services as you were physically located in your office

On this page you will find a short guide to get you started using IL Remote Workspace. The impatient can see these [example videos](#) (*accessible via intranet*).

Login to Remote Workspace

Browse to https://remote.lorentz.leidenuniv.nl <i>Any modern browser would do, but Firefox and Chrome are advised</i>	
Access by using your Lorentz Institute credentials <i>Your username is the part preceding the @ symbol</i>	
Several failed login attempts will cause your IP to be banned <i>To unblock your IP address contact the helpdesk</i>	
The <i>only</i> bookmark that will work is https://remote.lorentz.leidenuniv.nl <i>Other bookmarks will cause login errors</i>	

Using Remote Workspace

Dashboard

The screenshot shows the IL Remote Workspace dashboard. At the top, there's a navigation bar with 'Files', 'Interactive Apps', and 'My Interactive Sessions'. Below this, a 'Quota & Server Status' section displays three progress bars: 'Disk space usage on /home/serac1.1' at 37%, 'Server load as reported by the resource manager' at 0.01, and 'Server memory as reported by the resource manager' at 9%. There are also 'Quick Links' for 'Launch Desktop', 'Launch Jupyter', and 'Current Interactive Sessions'. A 'Use-case Scenarios' section lists remote working, intranet access, and file access. A 'Remote Workspace Known Issues' section advises not to use the app for large files.

Start/monitor/manage your remote sessions via the Dashboard

View/edit/create/transfer files

The system GUI cannot handle large files (max 1GB is advised)

Quota information and server status

Do not ignore quota warnings, because many applications rely on free home space to work correctly

The server should be able to handle up to 20 concurrent remote sessions

Each interactive session allocates 4 CPUs and 16 GB RAM to a user

A user can only request 1 session per time

Files

Access your files by clicking on the Files dropdown menu on the toolbar

Different users have access to different file locations

Seamlessly manage files stored on the IL disks

Transfer files from/to your laptop using the browser

No extra software or browser plugins needed

The GUI does not to work well with large files (max 1GB)

Transfer large files from/to using your favorite sftp client to `ssh.lorentz.leidenuniv.nl`

The screenshot shows a file browser interface for the home directory /home/bongo/. It lists various directories like Desktop, Documents, Downloads, Maildir, Music, Pictures, Public, Templates, Videos, mail, ondemand, public_html, and test. Each entry shows its size and modified date.

Interactive Apps

The screenshot shows the 'Interactive Apps' menu with options for 'Desktops' (Lorentz Institute Workstation) and 'Servers' (Jupyter Notebook). The 'Lorentz Institute Workstation' option is selected, showing details about launching an interactive desktop with 16GB of RAM and 4 CPUs. It includes a 'Number of hours' dropdown set to 12 and a 'Launch' button.

Access Interactive Apps via the toolbar Interactive Apps menu or via the Quick links buttons in the Dashboard.

Choiches are

- Lorentz Institute Workstation
- Jupyter Notebook

Workstations are preconfigured with several softwares

An interactive desktop or notebook (session) can last a max of 72 hours

Past that mark, it will be terminated

Connectons to an unterminated (active) session is always possible

even after logging out by clicking on My Interactive sessions toolbar menu

An interactive session tab reports

- session remaining time
- allocated resources
- link to debugging files

Active sessions can be terminated by clicking on DeLete

The screenshot shows the details of a Jupyter Notebook session. It indicates the session is running with 1 node and 4 cores. It provides the host address, creation time, time remaining (58 minutes), and session ID. There is a 'Delete' button and a 'Connect to Jupyter' button.
