

Enroll in DUO

You have to enroll the two factor authentication (2FA) DUO.

The first step in this procedure is that you register yourself in the 2FA system called DUO. For this, login with your PHYSICS account on the WEB-mail, <http://webmail.physics.leidenuniv.nl>

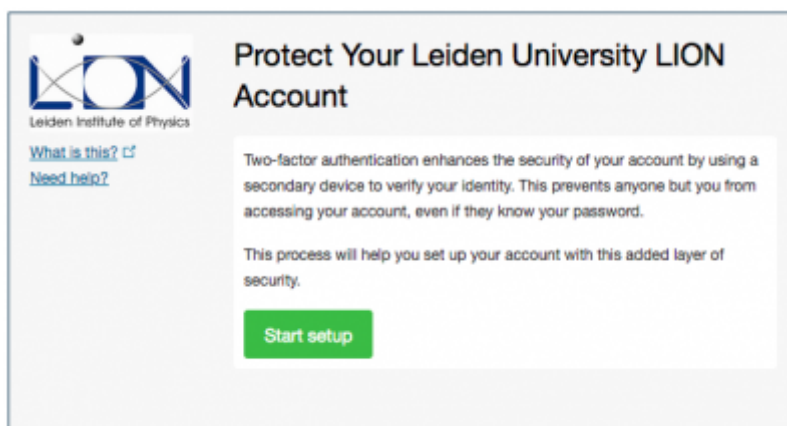

You will now be presented a setup procedure, as show and explained below. Just follow the instructions and you are all set for two factor authentication.

For the time being this will only work for the webmail in order to let you have some experience with the system.

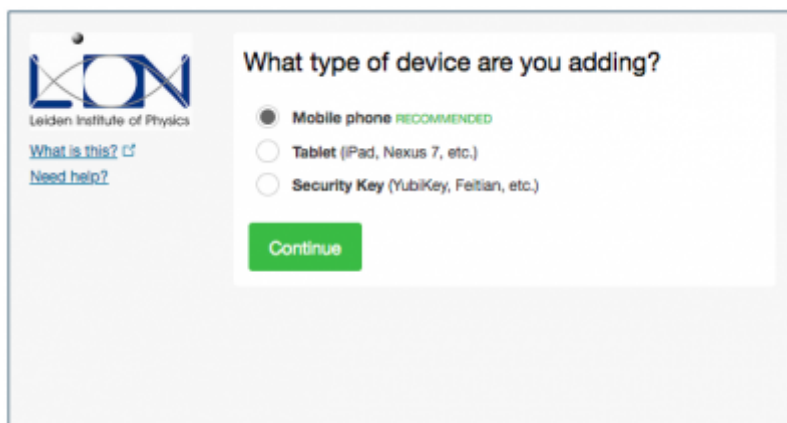

If you have any questions, contact: Helpdesk@Physics.LeidenUniv.nl

Setup Procedure

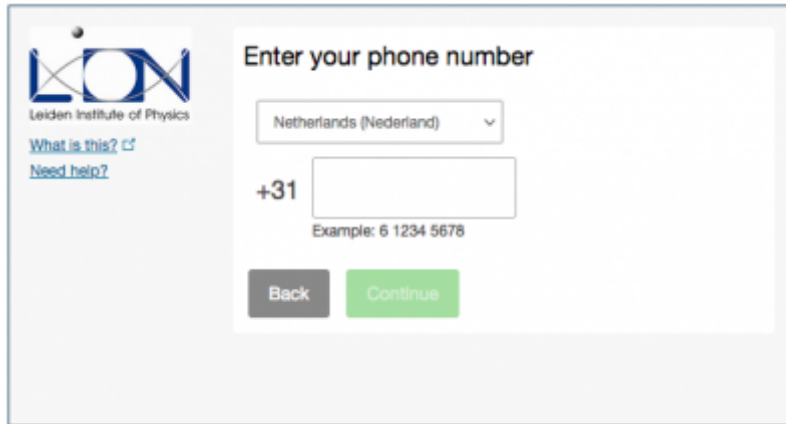

If you have never enrolled in DUO you will be presented a series of windows displayed below. The first window introduces you to the setup procedure.

Click 'Start setup' to continue to the actual setup.

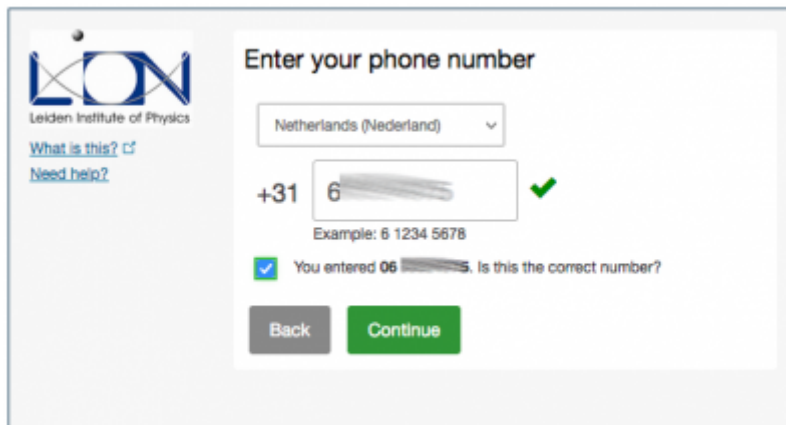

We will setup the most standard situation, where you have a smart phone on which you can install the DUO app. Note that if you own an old Android phone, you must be a version 8.0 or higher. If this is not the case, you will need to ask for a yubikey hardware device from the IT department.

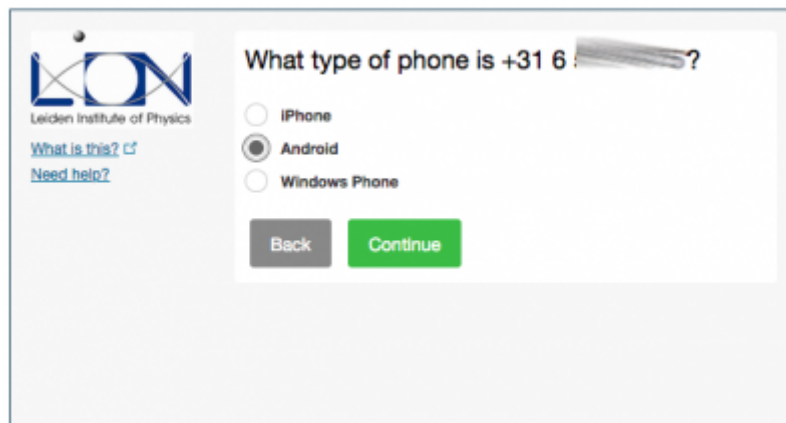

The screenshot shows the 'Enter your phone number' screen. On the left is the Leiden Institute of Physics logo and links for 'What is this?' and 'Need help?'. The main area has a dropdown menu set to 'Netherlands (Nederland)'. Below it is a text input field with '+31' on the left and an empty field. An example number '6 1234 5678' is shown below the input. At the bottom are 'Back' and 'Continue' buttons.

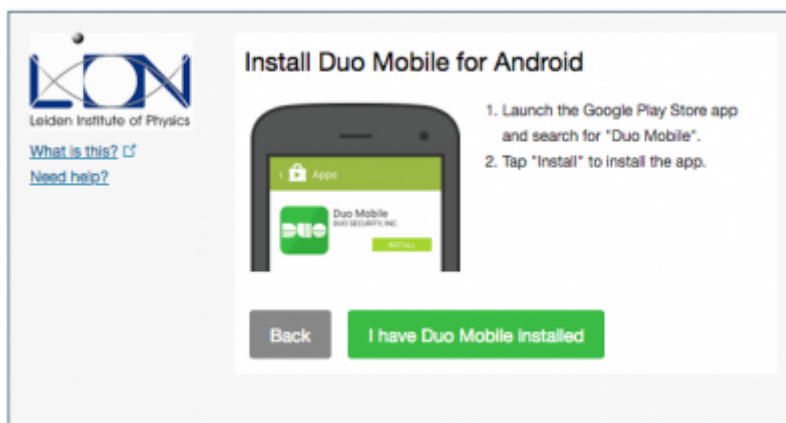

In order for the DUO system to be able to push login authentication request to your phone, you need to provide your mobile telephone number.

This screenshot shows the same 'Enter your phone number' screen, but the input field now contains the number '6'. A green checkmark is visible to the right of the input field. Below the input field, the text 'Example: 6 1234 5678' is present. A confirmation prompt is shown: 'You entered 06 [redacted] 5. Is this the correct number?' with a checked checkbox. The 'Back' and 'Continue' buttons are at the bottom.

The screenshot shows the 'What type of phone is +31 6 [redacted]?' screen. It features three radio button options: 'iPhone', 'Android' (which is selected), and 'Windows Phone'. The 'Back' and 'Continue' buttons are at the bottom.

The screenshot shows the 'Install Duo Mobile for Android' screen. On the left is the Leiden Institute of Physics logo and links. In the center is an image of a smartphone displaying the Duo Mobile app in the Google Play Store. To the right of the image are two numbered instructions: '1. Launch the Google Play Store app and search for "Duo Mobile".' and '2. Tap "Install" to install the app.' At the bottom are 'Back' and 'I have Duo Mobile installed' buttons.
