

# Security

This wiki section describes the basic security measures that should be/are in place at Leiden Observatory and LION Physics Institute. As both institutes are part of the Leiden University the full [University Security Policy](#) is applicable.

## Security level

### Availability, Integrity and Trust liability

There are several levels of these security elements in terms of services and data. We denote the following:

Service	Availability	Integrity	Trust liability	Details
Mail	High	High	High	<a href="#">Mail</a>
Home directory	High	High	High	<a href="#">Home directory</a>
Web	Medium	High	High	<a href="#">Web</a>
Remote access	Medium	High	High	<a href="#">Remote Access</a>
Scientific computing	Medium	High	High	<a href="#">Scientific computing</a>
Data	Medium	High	High	<a href="#">Data</a>

## Security Baseline

For your information this sections describes the actions taken to provide the necessary security measures to ensure save and reliable operations with your and our data.

- [Development and maintenance](#)
- [Auditing](#)

## GDPR in research

The University ask you as a scientist have to work conform the GDPR requirements in place since march 25, 2019. There is a [University webstack](#) that gives you guidelines when you are dealing with personal data. Fortunately Astronomy does not deal with personal data, but it is wise to consider each aspect of your scientific work and its relation to GDPR.

This page gives you links to aspects of and tools which may concern GDPR issues.
