

First Time Access

Remaining Setup

Figure 1: Private Email Confirmation
(Click image to enlarge).

The Identity Provider will then present you a window explaining that an email has been sent to your 'private email box'. This email contains a link (yes, indeed it is a clickable link, which is necessary as the security key provided is too complicated to type it in. But you should make sure that the link is pointing to our `idp.strw.leidenuniv.nl` identify server. Only after this verification you should click the link).

Now look at your private mail inbox and find there the mail with

Subject: Verify email

From: Observatory Identity Provider

And body text, similar like this, but made a bit more personal (not shown here for security purposes):

Someone has created a Leiden Observatory Intranet account with this email address. If this was you, click the link below to verify your email address

Link to e-mail address verification

This link will expire within 5 minutes.

If you didn't create this account, just ignore this message.

where the text `Link to e-mail address verification` contains the link to verify and confirm your 2FA setup. For your information the link starts like:

`https://idp.strw.leidenuniv.nl/auth/realms/STRW/login-actions/action-token?key=eyJhbGciOiJIUzI1NiIsInR5cCI6Ikp0aXA...` and the key is a long series of characters.

Pasting the link in a WEB browser asks again for your credentials. Submit this form and you are now fully setup for Two Factor Authentication. A private email address is necessary to allow you to reset 2FA if necessary.
