

webmail

A webmail interface is available to all users, both locally, and from anywhere in the world.

- [Sterrewacht Webmail](#)
- [Instituut Lorentz Webmail](#)
- [LION](#)

Our current webmail of choice is [Roundcube](#). A more limited interface named [Squirrelmail](#) is available as well. The websites of these programs, and their built-in help pages, contain all the documentation you will probably ever need.
